Immediate Release: October 14, 2015

The City of Escanaba would like to remind all residents that City Ordinances require property owners to keep all utility meters accessible to City personnel for reading and inspection. The City asks that you remove obstructions which could prevent access to meters. This includes trimming hedges, shrubs, and trees which may be growing up around meters. Residents are also asked to be mindful of snow and ice accumulation around meters, and to correct those conditions before they obstruct meter access. Residents are encouraged to contact the City Utility Billing Department at (906)786-0552 with questions concerning meter accessibility.
